

New Converting Solutions

Cerutti

Casale Monferrato, March 2011

Dear Customer,

The Cerutti Group continues with its strategy as a global supplier for the packaging materials printers and converters business.

We have been holding a leading position for a long time both in the market of gravure and flexographic printing - with and without in-line lamination - and of cardboard die-cutting from sheet and from reel.

In this last year we have been accredited also to a growing success in the converting field and consequently have decided to enhance our structure dedicated to this sector by establishing a specific team of technologists and engineers of longstanding experience.

We are now more than ever before in a position to satisfy the requirements of the market for what concerns wax and hot-melt coating machines, solvent and solvent-less laminating equipment - in and off line - and unsupported alufoil lacquering equipment.

We are confident that this decision of ours will be of interest to you and we are prepared to meet you to illustrate the most appropriate solutions for your requirements.

I take this occasion to send you my very best regards,

Giancarlo Cerutti
